DRAINAGE WATER MANAGEMENT TRAINING WORKSHOP

JULY 14 & 15, 2009

**AIRPORT HOLIDAY INN
DES MOINES, IOWA**

PROGRAM INFO

Drainage water management is a practice that allows a producer to exercise greater control over a drainage system in such a way as to reduce drainage during certain times of the year (when less drainage is needed), and provide for adequate drainage when needed most. Drainage water management has the potential to improve water quality by reducing the quantity of nutrient enriched drainage water leaving fields, and provide production benefits by extending the period of time when water is available to plants.

Instructors

Matthew J. Helmers, Ph.D.
Iowa State University

IOWA STATE UNIVERSITY
University Extension

Jeff Strock, Ph.D.
University of Minnesota

Gary R. Sands, Ph.D.

AGENDA

DAY ONE

Intro to Drainage Water Management (DWM)

Basic DWM concepts, providing rationale and benefits, history and present status of the practice

Soils for Drainage and DWM

Discussion will include soil properties, general principles and flow to ditches and streams

Break— sponsored by Prinsco, Inc.

Economics Considerations

Discussion of systems costs, profitability analysis, and federal cost sharing availability

Lunch— sponsored by Agri Drain Corp.

DWM Design

Work Sessions allowing participants to develop a DWM plan and design on several fields, contrasting conventional with zone systems, using both retrofit and new systems

Break— sponsored by Fratco

Management of System

Session will discuss seasonal considerations (off-season vs. growing season) and the drawdown of WT following an event (with vs. w/o boards)

- Installing and checking wells

DAY TWO

Field Day Bus Tour

Drainage Water Management Structure installation at Iowa LICA Research Farm located 1/2 mile east of Melbourne— 1740 290th Street.

HOW TO REGISTER

Please return form and payment
by **June 30th, 2009**
to avoid any late charges.
